

PRODUCT CATALOGUE

2025 | **October 2024 to September 2025** | **INTERNATIONAL**

Dear friends of the green industry,

we say thank you!

Thank you for a successful gardening season, which we were able to shape positively together with your support and your trust in our natural products. Your loyalty strengthens our motivation to continue to be a reliable and innovative partner for you.

As we look ahead to the coming year, we face new challenges. Because from 01.01.2025 the ChemBiozidDV (Biozidrechts-Durchführungsverordnung, eng.: Biocide Law Implementation Ordinance) comes into force. As your reliable partner, we are already ready to help you today and are in a position to offer you our comprehensive support, so that you can continue to grow in this segment next year. From innovative and new over-the-counter products to extensive training programmes and eye-catching POS solutions.

But it is not just the new legal guidelines that are shaping our joint growth. In the face of climate change, the requirements imposed by nature and, as a result, the needs of our end consumers are also changing constantly. Saving water is becoming increasingly important. With our innovative 3-layer design, we can offer you comprehensive product solutions. Look forward to new and environmentally friendly sales potential.

Here's to a successful green season together in 2025!

A handwritten signature in black ink, appearing to read 'R. von Herman'.

Our measures for more ENVIRONMENTAL PROTECTION

Recycled material in our packaging

We are constantly optimising our product packaging

- ✓ 2/3 of our peat-free NeudoHum soil bags have been converted to films with 80 % recycled content
- ✓ this saves us 34 tonnes of CO₂e* in new plastic compared to the previous packaging – which means that we have already avoided over 27 % of CO₂e* in the current year
- ✓ we would need to plant 2,700 beech trees or about 3,86 hectares of forest

We are also converting all of our Azet® fertiliser sticks to environmentally friendly folding boxes

- ✓ a folding box is made from 80 % waste paper
- ✓ this avoids 10 % CO₂e*

Recycling in packaging

We consistently focus on packaging that remains in the recycling cycle:

- ✓ all of our paper packaging can be disposed of via the waste paper recycling
- ✓ wherever possible, we avoid multi-component packaging
- ✓ much of the plastic packaging was checked by Interzero for recyclability, with the results "very good" and "good"
- ✓ the following components have received the "Made for Recycling" certificate:

- ✓ mono-PE film bags
- ✓ our plastic bottle series
- ✓ ant bait boxes

Verified sustainability for 2024

In 2024 we were again awarded "guaranteed sustainable" by the German Institute for Sustainability and Economics.

The areas of ecology, economy and social skills were assessed.

This includes the following topics:

- ✓ quality of products, service and advice
- ✓ economic future orientation
- ✓ business management
- ✓ environmental and social responsibility

*CO₂e: CO₂ equivalents

ChemBiozidDV

NEW REGULATIONS AS OF 01.01.2025

From 01.01.2025 certain biocides may only be handed over to customers after consultation with competent sales personnel.

This will have an impact on sales:

- ✓ changes to shelf space due to the new self-service ban
- ✓ adjustments to the product range to secure sales
- ✓ additional qualification for your staff

We are at your side as a reliable partner to help you deal with these challenges.

We offer you:

- ✓ a future-proof full range for the various product groups
- ✓ attractive POS solutions for continued strong sales
- ✓ a training programme for your sales staff

Our NEW PRODUCTS FOR 2025

secure self-service sales despite the ChemBiozidDV

Benefit from our full range of over-the-counter pest control products and secure your sales – without advice costs.

Ant Stop AF¹⁾

- ✓ ready-to-use spray with geraniol
- ✓ can be used directly and with a rapid effect

You can find more information on p. 83

Ant Stop¹⁾

- ✓ granules for use around the home
- ✓ repels ants and diverts ant trails

You can find more information on p. 83

Permanent[®] Silverfish Stop

- ✓ adhesive trap for reliable identification of infestation
- ✓ free of insecticides and odourless

You can find more information on p. 86

¹⁾ Biocidal products must be used with care. Always read the label and product information before use.

Permanent® Fruit Fly Stop

- ✓ adhesive trap for catching fruit, vegetable and vinegar flies
- ✓ space-saving turret shape
- ✓ free of insecticides and odourless

You can find more information on p. 94

Permanent® Lavender Fragrance Sachets

- ✓ scented sachets for wardrobes and chests of drawers
- ✓ unobtrusive and easy to place

You can find more information on p. 91

Permanent® Wasp Stop

- ✓ reusable bottle cap
- ✓ compatible with any commercially available beverage bottle
- ✓ free of insecticides

You can find more information on p. 89

Permanent® Vermin Stop

- ✓ ready-to-use spray
- ✓ free of insecticides
- ✓ wets vermin and immobilises them reliably

You can find more information on p. 86

Our NEW PRODUCTS FOR 2025

Permanent® Fly Stop

- ✓ adhesive triangle trap for controlling and monitoring flies
- ✓ no dead flies are directly visible
- ✓ free of insecticides and odourless

You can find more information on p. 92

Permanent® Fly Stop

- ✓ adhesive trap with a design for controlling and monitoring flies
- ✓ free of insecticides and odourless

You can find more information on p. 92

Natural solutions for growing

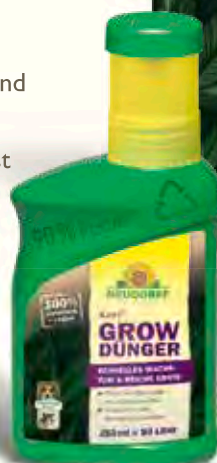

Due to the legalising of private cannabis cultivation, many consumers are looking for solutions for a fast, pure and rich harvest. Unlock these sales potentials with our natural grow products in proven organic quality from Neudorff.

Azet® Grow Fertiliser

- ✓ 100% natural and vegan
- ✓ promotes rapid growth and the quality of the plant
- ✓ ensures a plentiful harvest
- ✓ optimally geared towards cannabis

You can find more information on p. 45

NeudoHum® Grow All-Mix

- ✓ 100% peat-free and vegan
- ✓ 100% organic
- ✓ promotes rapid growth and a rich harvest
- ✓ optimally geared towards cannabis

You can find more information on p. 18

Expertise in a range of vegan products

Almost 1/3 of the German population pays attention to a plant-based diet and wants to eat healthily.* So that you can exploit the leverage the resulting sales potential, we offer you our coordinated vegan fertilisers. **Naturally organic and vegan.**

Azet® Vegan Horn Shavings

- ✓ organic long-term nitrogen fertiliser
- ✓ innovative plant-based alternative to tried and tested products
- ✓ for guaranteed plant growth and a rich harvest or flowering

You can find more information on p. 31

Save water by design

In times of climate change, robust plants and the responsible use of water are essential for garden owners. With our complete water-saving design, you can offer your customers the sustainable solution – **for a boost to your sales.**

Evaporation protection

- ✓ the soil; cover forms a natural protective layer that reduces evaporation of water in the soil
- ✓ made from natural raw materials
- ✓ easy to apply

You can find more information on p. 21

Water reservoir

- ✓ natural clay minerals soak up water like a sponge and, as a result, store up to 35 %[#] more water
- ✓ perfect for all crops in raised beds, vegetable beds and tubs

You can find more information on p. 21

Root-strong

- ✓ prepares the plant for optimally dry periods and allows the plant to survive them better
- ✓ perfect for all crops in raised beds, vegetable beds and tubs

You can find more information on p. 21

Our NEW PRODUCTS FOR 2025

Effective solutions for the lawn

We are complementing our high-volume lawn care range with product solutions for simple, universal applications and fast and visible success. Requires minimal advising effort for high sales in a small space.

Lawn Fertiliser Moss & Weed Stop

liquid

- ✓ expands the successful Moss & Weed Stop lawn fertiliser to include liquid application
- ✓ unlocks new sales potential through the additional and over-the-counter application
- ✓ ensures a dense, strong and green lawn without moss and weeds

You can find more information on p. 25

Universal Lawn Seed

- ✓ a lawn seed for all areas
- ✓ a combination of sales volumes for higher throughput
- ✓ comprehensive design for lawn care: from new sowing to soil improvement to fertilisation

You can find more information on p. 29

Azet® Lawn Green

- ✓ first aid against yellow spots in the lawn – for a flawless lawn
- ✓ quick and easy watering application
- ✓ a perfect addition to the range: while Lawn Repair works seamlessly to repair areas where there is no longer any grass, Lawn Green is available for areas where there is still grass

You can find more information on p. 26

Our OUR OPTIMISATIONS FOR 2025

BioTrissol® is changing into Azet®

- ✓ all fertilisers now come under the high-selling umbrella brand Azet
- ✓ new recipe – innovative raw material from natural corn
- ✓ 100 % organic and without synthetic additives

All NeudoHum® soils are becoming vegan

- ✓ all NeudoHum soils will become vegan from spring 2025
- ✓ in combination with organic and peat-free, this completes our range for this high-purchase, environmentally sensitive target group
- ✓ ensures the retention of existing customers and the potential development of new nutrition-conscious customers

You can find more information on p. 12

Azet® Fertiliser Sticks

- ✓ all Azet Fertiliser Sticks have been uniformly converted to our environmentally friendly folding boxes
- ✓ a larger communication area ensures more attention and purchase incentive
- ✓ easier handling of the products thanks to the practical folding box

*For natural gardening,
recommend our*

PEAT-FREE NEUDOHUM SOIL

Our soils are **ORGANIC** and, of course, peat-free – to provide active protection for our bogs. We have been doing that for over 20 years now.

In conventional substrates, peat is used predominantly as a raw material with significant negative effects on our environment.

Because of draining for, among other things, the mining of peat, bogs have been irretrievably destroyed. Important habitats for rare plants and animals were lost. This threatens biodiversity.

ORGANIC

+ peat-free
= less CO₂

Peat also stores more CO₂ worldwide than all of the world's forests combined. If the natural product is degraded, the harmful greenhouse gas carbon dioxide is released in large quantities. This drastically increases climate change. The peat-free NeudoHum soils can reduce CO₂ emissions by up to 72 % compared to standard potting soils made from 100 % peat.

We continuously check the quality of our NeudoHum soils produced in Germany, both internally and externally. The main component of the soils are quickly-regenerating, regional raw materials, such as, for example, wood fibres and bark humus. All of our soils are vegan.

NeudoHum® Universal Soil

- ✓ universal soil for plants on the balcony and in the garden
- ✓ promotes vigorous and healthy plant growth
- ✓ for radiantly beautiful seas of flowers
- ✓ particularly reliable harvest thanks to the water storage capability
- ✓ improves nutrient storage capacity
- ✓ biological growing medium made from plant substances with organic NPK fertiliser, which is sufficient for 4 weeks

VEGAN

Item No. VE Germany	packed to	Available Countries	Private Label

NeudoHum® Raised Bed & Greenhouse Soil

- ✓ for healthy and aromatic vegetables and herbs
- ✓ for all plants in raised beds, greenhouses, beds, tubs and balcony boxes
- ✓ optimises the water and air balance in the soil
- ✓ strengthens root growth and thus increases the water and nutrient absorption of the plants

VEGAN

Item No. VE Germany	packed to	Available Countries	Private Label
EURO PALLET 01003	30 x 75 Ltr. sack	 	

Early-purchase item/available over-the-counter

Did you know

that a study of the CO₂ balance of peat substitutes showed that, depending on the soil type and packaging, 43 % to 70 % of the climate-damaging carbon dioxide is saved compared to standard mixtures that contain peat? If you use peat-free NeudoHum soils, you can, therefore, contribute to the reduction of CO₂.

NeudoHum® Raised Bed & Garden Compost

- ✓ RAL-quality-assured green cut compost
- ✓ optimal as a second layer in a raised bed
- ✓ emergency aid for humus-poor soils and substrates
- ✓ also suitable for perennial beds
- ✓ improves the water and nutrient storage capacity

Item No. VE Germany	packed to	Available Countries	Private Label
EURO PALLET 01004	48 x 40 ltr. sack	 	

Early-purchase item/available over-the-counter

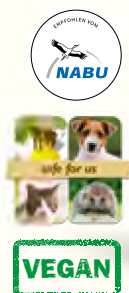

NeudoHum® Tomato & Vegetable Soil

- ✓ specially tailored to the needs of tomatoes, cucumbers, pumpkin, courgettes and peppers
- ✓ with and extra portion of potassium for aromatic tomatoes and vegetables, including those in raised beds
- ✓ the fibre structure ensures a higher water and nutrient storage capacity
- ✓ higher weight provides the plants with very good stability in a bucket
- ✓ growing medium made from plant substances, clay and organic NPK fertiliser, which is sufficient for 4 weeks

Item No. VE Germany	packed to	Available Countries	Private Label
½ EURO PALLET 00969	54 x 20 ltr. sack

The peat reduction strategy of the BMEL*

In the 2030 Climate Protection Programme, the German Federal Government has committed itself to reducing the use of peat as far as possible and, where possible, to refrain from using peat altogether. This is already being pursued by 2026 in the hobby sector. With peat-free NeudoHum soils, you can secure sales for the future today.

* German Federal Ministry of Food and Agriculture

NEW

VEGAN

NeudoHum® Grow All-Mix

- ✓ optimally geared towards cannabis
- ✓ promotes rapid growth and ensures a substantial and content-rich harvest

SOIL IMPROVEMENT

At a time when climate change is challenging our ecosystems, it is crucial to take action to protect and revitalise our soils. This is where our products come in: they help to improve depleted soils and regain their natural vitality. Through the targeted promotion and activation of soil life, we can create an environment in which micro-organisms and nutrient cycles are brought back to life.

Our products also support the water storage capacity of the soil, which is invaluable, especially in times of increasing droughts.

Because we are firmly convinced that healthy soil with an active soil life and high water storage capacity is the basis for healthy plants and a responsible use of resources.

pH Soil Test

- ✓ Soil test set for easy and accurate determination of the pH value of cultivated soils
- ✓ the ideal first step towards soil improvement and determination of lime requirements
- ✓ can be carried out in a few minutes without any prior chemical knowledge
- ✓ the amount of lime needed can be read off using simple tables and the pH value determined
- ✓ easy to use thanks to its powder form

Item No. VE Germany

Azet® Garden Lime

- ✓ for fertile soil and a better effect from fertilisers
- ✓ neutralises soil acids and prevents heavy metals from being absorbed by the plant
- ✓ beaded, easily soluble and quick acting
- ✓ carbonated lime (84% CaCO₃ and 10% MgCO₃) with iron and natural Azotobacter soil bacteria

Application

- ✓ 50-100 g/m² for maintenance liming
- ✓ correspondingly higher amounts are possible for remedial liming after determining the pH value

Item No. VE Germany	packed to	Available Countries	Private Label
CARTONED GOODS 01321	4 x 2.5 kg folding box		

Over-the-counter

Neudorff's Primordial Rock Flour

- ✓ diabase rock flour of natural, volcanic origin for the whole garden
- ✓ is used to re-enrich the soil with valuable mineral substances and trace elements
- ✓ ideally suited for iron and magnesium supply to lawns
- ✓ made from natural raw materials and suitable for organic farming
- ✓ improves the taste of the harvest and increases its shelf life
- ✓ suitable for all crops and beds

Application

- ✓ apply 100-300 g/m² once per year, depending on soil condition

Item No. VE Germany	packed to	Available Countries	Private Label
CARTONED GOODS 01320	4 x 2.5 kg folding box

½ CONTAINER 00174	39 x 10 kg sack		

Over-the-counter

NATURALLY GREEN LAWN

with the Neudorff lawn care system

A good soil structure is the basis for vital lawns without moss and weeds. Because without active soil life, dying grasses and their roots become matted. Light and air can no longer reach the turf. The lawn turns yellow, becomes patchy and weeds spread. Neudorff's lawn care system activates soil life and improves lawn structure.

1

Test the
pH value

2

Improve
the soil

3

Fertilise
lawn

The optimally tailored, organic care products ensure a vital lawn that can naturally displace moss and weeds entirely on its own. Fertilisers and soil improvers strengthen the grasses and improve the soil. This makes the lawn more resistant to drought and other stressors.

Lawn Fertiliser Moss & Weed Stop

solid

- ✓ for dense lawns without moss and weeds
- ✓ a vital lawn naturally inhibits new moss and weeds
- ✓ for juicy greens thanks to the extra dose of iron
- ✓ with high potassium content for sturdy grasses and more resistance
- ✓ organic-mineral NPK fertiliser 8-4.5-13 with iron using fertilisers and herbal substances

Application

- ✓ 50-80 g/m² depending on weeds or moss infestation

Item No. VE Germany	packed to	Available Countries	Private Label
CARTONED GOODS 01306	5 x 2.5 kg folding box

Organic FERTILISE & CARE

Plants need balanced nutrition and care, so that they grow healthily, bloom beautifully and bear fruit. In nature, plants get their nutrients through the organic cycle:

- 1 Foliage falls to the ground and the naturally occurring micro-organisms decompose this material.
- 2 They form permanent humus, which improves the soil and its structure.
- 3 The plants absorb the nutrients released by breaking down foliage and everything starts over again.

This natural cycle is often interrupted in the garden, as we regularly remove plant material through pruning or harvesting. The soil is, as a result, depleted of micro-organisms, because they no longer find enough organic material to survive. In nature, there are hardly any nutrients available. That's why we help the plants with the right soil additives and fertilisers.

Themed display for self-sufficiency

- ✓ Matching assortment of
 - 16 x Azet potassium fertiliser 2 kg
 - 8 x NeudoHum Sowing & Herbs Soil 3 ltr.

PLANT CARE & STRENGTHENING

Vigorous and vital plants require less plant protection and are more robust. Our tonics contain the ingredients that each cultivation needs. The ingredients include natural amino acids, horsetail extracts and other plant extracts that are rich in trace elements. They support the optimal plant nourishment and vitalise plants susceptible to pests and diseases. At the same time, they provide nutrients to compensate for deficiency symptoms.

The products are made from natural raw materials and are harmless for humans and animals – for the sake of the environment.

Natural Power Packs

	BioKraft® Basic ingredient horsetail <small>Page 48/72</small>	BioKraft® Basic ingredient nettle <small>Page 48/65</small>
Product-service	to ward off plant diseases	to repel plant pests
Area of application	for fruit and vegetables	for fruits, vegetables and roses

Neudofix® Root Activator

- ✓ supports the growth of cuttings, young plants and other re-potted ornamental plants
- ✓ activates and accelerates root growth, creating a strong and deep root system in no time
- ✓ soil additive from rock flour, clay and algae flour

Application

- ✓ mix under the surface of the soil or sprinkle into the prepared planting holes, can also be stirred and poured into water

Natural prevention

Recommend the use of Neudo-Vital Rose Spray ideally immediately after leaf sprouting. With the many plant extracts it contains, it revitalises weakened plants and makes them more resistant to diseases, pests and weather-related stress factors. Wild shoots should also be cut out, so that the roses remain nice and airy. This also prevents fungal diseases.

insecticide-free BIOTECHNOLOGY & TREE CARE

Attractive effect

If troublemakers, such as fungus gnats or winged aphids are causing the harvest of tomatoes and the like to fail in the greenhouse, recommend the insecticide-free yellow panels to your customers.

They are coated with a special odourless glue that neither dries out nor drips off at higher temperatures. The yellow colour is specially tailored to the pests and attracts them. If the pests come into contact with the adhesive surface, they have no chance of escaping.

Our yellow stickers help with fungus gnats ("black flies") on flower beds in the living room. Simply plug them into the potting soil. Pests stick to them securely after contact.

Yellow stickers

- ✓ to control flying pests, such as fungus gnats, white flies, winged aphids, and miner flies
- ✓ ideal for use on house plants
- ✓ with special odourless, insecticide-free glue
- ✓ no dripping at high temperatures

Application

- ✓ insert 1 yellow sticker per infested plant directly into the potting soil

CARTONED GOODS 00816	6 x 2 ltr. bottle	  	

Over-the-counter

Our repellents against dogs, cats, martens and raccoons act on the sense of smell of the animals without harming them. After the affected areas have been cleaned, the protective effect of our products lasts up to 4 weeks, depending on the weather.

Moles are also driven away by the odour of the repellent without being harmed. Depending on the soil condition, the protective effect can last 4-6 weeks.

PROTECTING PLANTS GENTLE FOR BEES

Active ingredients from nature

The active ingredients in our Spruzit products are natural pyrethrum and rapeseed oil. The preparation Xentari Caterpillar-Free²⁾, which is highly effective against the boxwood borer contains the bacterium *Bacillus thuringiensis aizawai*. The Neudosan products, on the other hand, protect plants against pest infestation with potassium salts of natural fatty acids, making them a type of plant soap.

For us, the protection of people and nature is one of the most important selection criteria in product development. That is why we mainly use active ingredients in our products which are also found in nature.

Excellent for protecting bees

All of these active ingredients ensure that our plant protection products are not hazardous to bees^{B)}.

²⁾ Use plant protection products carefully. Always read the label and product information before use. If necessary, observe the warnings and symbols in the instructions for use.

^{B)} NB 6641: Non-hazardous to bees (B4)

Fight pests on orchids gently

Orchids are fascinating and easy-care plants, but they are occasionally infested with pests, such as woolly aphids and mealybugs, scale insects, thrips and spider mites. These suck the plant sap and weaken the orchids.

Spruzit Orchid Pest Spray²⁾ offers a quick and reliable solution against these pests. Thanks to the special combination of active ingredients, even stubborn scale insect and woolly aphids are combated safely without damaging the plants.

²⁾ Use plant protection products carefully. Always read the label and product information before use. If necessary, observe the warnings and symbols in the instructions for use.

¹⁾ according to Regulation (EU) 2018/848 [®] NB 6641: Non-hazardous to bees (B4)

ELIMINATE WEED & MOSS

Ban weeds for the long term

Weeds are annoying, because they keep coming back. That means: keep fighting them. However, the effort can be reduced greatly and weeds banned in the long term with the right products.

For this purpose, we offer natural products with active ingredients from nature. Gentle on humans and animals.

FIGHT SLUGS RELIABLY

No dead slugs visible

Our Ferramol Slug Bait²⁾ is a very attractive bait for all plant-damaging slugs. The active ingredient iron (III) phosphate reliably stops slugs from eating immediately after ingestion of the bait, which protects crop plants. Unlike other active ingredients, there is no mucus secretion on the beds and paths. The slugs retreat to their hiding places after eating the bait and die. Any bait grains that are not absorbed decompose over time into iron and phosphate. These two plant nutrients also occur naturally in the soil. Ferramol and the active ingredient contained therein are gentle on pets and hedgehogs and are also not dangerous to bees^{B)}.

*Product usable in organic farming according to Regulation (EU) Nos. 2018/848 and 2021/1165. Controlled by ECOCERT F – 32600.

Approval No.: 027744-60

Ferramol® Slug Pellets compact²⁾

- ✓ against slugs on all vegetable, fruit and ornamental plant species
- ✓ non-toxic to pets and protects hedgehogs, birds, earthworms, bees and other beneficial organisms
- ✓ no slug carcasses visible, no slurring of the slugs
- ✓ no waiting times until harvest
- ✓ suitable for organic farming¹⁾
- ✓ 19.8 g/kg iron (III) phosphate

Application

- ✓ Spread at an application rate of 2.5 g/m² over a wide area

COMBATING PESTS RELIABLY

Combating ants – safely and quickly

Ant trails on paths or nests under patios are not only annoying, but can become a real problem. As a result of their activities, ants transport sand upwards from the substructure under paving surfaces. This means that stones or slabs become uneven and, as a result, a tripping hazard.

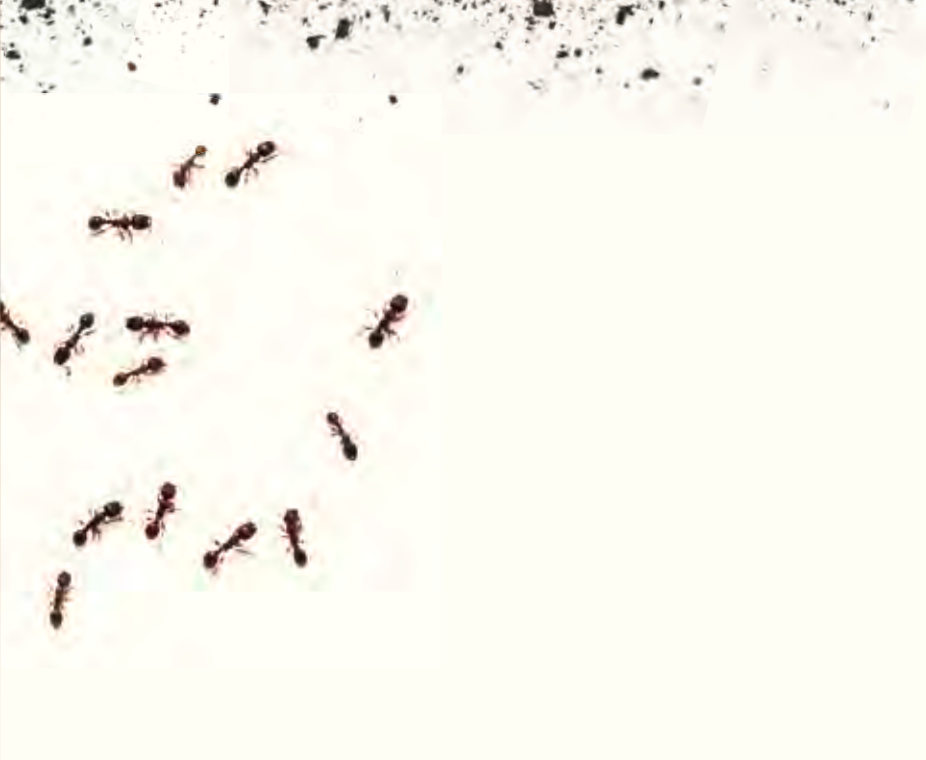

From March onwards, ants can also cause problems in the kitchen. To provide for their offspring, they slip into the house to find treats.

*Our products can
easily remedy this.*

In addition to the proven Loxiran products, we also offer over-the-counter alternatives against ants. These are based on the active ingredient geraniol.

In addition, we are expanding our Permanent range with over-the-counter alternatives.

baua (German Federal Office for Occupational Safety and Health) Reg. No.: N-113973/PT19

Ant Stop¹⁾

- ✓ granules with geraniol

Remove unpopular insects immediately and without worries

Sometimes insects get lost in our living spaces, where they bother us. In order to release the animals back into the open, the Permanent Vermin Ice Spray simply puts wasps, silverfish and the like into a frozen state, so that they can easily be placed outside.

¹⁾ Biocidal products must be used with care. Always read the label and product information before use.

COMBAT FLYING VERMIN EFFECTIVELY

Combat mosquito larvae sustainably and organically

For warm summer evenings on the patio and a romantic atmosphere with a cool drink, recommend our Neudomück Mosquito-Free¹⁾ to your customers. It kills the larvae of mosquitoes in ponds, ponds and rain barrels through special micro-organisms, so that the nuisance caused by mosquitoes decreases significantly. It is a biological agent, which is why fish, plants and other aquatic organisms are not affected.

¹⁾ Biocidal products must be used with care. Always read the label and product information before use.

CLEAN SURFACES EFFECTIVELY

Green coverings, such as algae and moss, not only look unsightly, but also damage the surfaces of outdoor areas and often make the surfaces dangerously slippery. Our cleaning products provide effective solutions to remove these green deposits.

Our bottles are recyclable and consist of up to 90% recycled material.

Permit No.: DE-0013147-02-0002-02/PT02

NATURALLY VALUABLE COMPOST

Nature makes it happen!

In nature, leaves and other plant remains are decomposed by organisms. Earthworms, woodlice, spring tails and micro-organisms ensure that there is little of the thick foliage from autumn left in the spring. They produce nutrients and humus that improve the soil and allow new plants to grow.

Composting in the garden works similarly – but in a more targeted way.

Thermocomposter

“Neudorff DuoTherm®“ 530 L

- ✓ compost silo for quick composting in the garden
- ✓ excellent thermal insulation thanks to its double-walled construction with stable, weatherproof and UV-resistant HDPE plastic
